

Sending Audio & Video to the remote Skype participants requires settings that are like Recording a Call to Videotape or DVD

Ref from - Administrator's Guide for the VSX Series. Version 9.0.6

All audio from the near site and far site is recorded, along with the video source configured on the Monitors screen.

To configure VCR/DVD video settings for recording a call:

- 1. Go to System > Admin Settings > Monitors > Monitors.**
Choose a setting for **Monitor 2**.

When Monitor 2 is set to **Off**, you can specify which video sources to record.

When Monitor 2 is enabled, the VCR or DVD player records what is shown on Monitor 1.

- 2. Go to System > Admin Settings > Monitors > Monitors > Next.**

Select one or more sources for the **VCR Record Source**.

If you select both near and far, the VSX system automatically switches recording to the site that is talking. If you select content as a record source, it is recorded (when available) regardless of who is talking.

To configure VCR/DVD audio settings for recording a call:

- 1. VSX 6000, VSX 7000: Go to System > Admin Settings > Audio > Audio Settings.**

Clear **Enable Polycom StereoSurround**. When StereoSurround is enabled on a VSX 6000 or VSX 7000, the system cannot record audio from a call.

- 2. VSX 6000, VSX 7000: Go to System > Admin Settings > Audio > Audio Settings > Next > Next.**

Set **Line Outputs** to **VCR - Far and Near Audio**.

- 3. VSX 7000s, VSX 7000e, VSX 8000: Go to System > Admin Settings > Audio > Audio Settings > Next > Next.**

Adjust the **VCR/DVD Out Level** if necessary.

Enable **VCR/DVD Audio Out Always On** unless you have the VCR/DVD inputs and outputs both connected to the same device to play and record.
